It is desirable to do glass or wood containers in a dry, protected from light and direct sunlight.

The types of honey and some of its features

Bee honey in the city of Tacoma is divided into types depending on the pollen of some plants he collected. Therefore, to obtain a particular variety, the bees are transported to different places, dominated by the type of vegetation. And doing this at a time when flowering reaches its peak. Health bee products. By this criterion distinguish sunflower, buckwheat, lime, saffron, acacia, sweet clover. The name is taken from the corresponding honey. However, there are other division. For example, honey can be meadow or grassland, forest, mountain and even "drunk". The latter is obtained at the moment when bees collects pollen from poisonous plants. It can adversely affect human health and cause poisoning. But after long-term storage becomes harmless. Although the use of this product no longer remains. The honey is light and dark. Palette light colour starts from and ends almost transparent rich yellow. Dark honey brown or nearly black. Initially, every product has a liquid, viscous consistency. But over time the process of crystallization, the color of honey and it becomes lighter. At each class period curing different. Some types of honey can be very long to maintain its liquid form. It is worth noting that in secretariatmola product useful properties or slightly less than fresh, just assembled with the comb. If you want to return honey original appearance, then simply warmed it up. But you must do it very carefully. Because overheating can destroy all the beneficial properties of this delicacy. Honey with propolis and Royal jelly. That's why healthful and delicious substance should not be added directly to the tea when it is still hot, and it has a bit of sugar, spreading on bread or just eating with a spoon. Many people in Tacoma love to eat honey in the comb. It is very tasty. Just imagine: a piece of honeycombs with sealed cells filled to the top with honey. Chew it need. Thus the beneficial properties of honey keeps best. Because wax is a natural storage environment of the product. To swallow its remains, of course, not worth it. Very pleasant taste with a whipped honey. Conventional product is placed in a special powerful mixer, beat him, saturating the air bubbles. Royal jelly for hair reviews. Honey is a light mousse that just melts in your mouth.
